Word to Vec JS Demo

Similar Words

Enter a word and see words with similar vectors.

Target word List words

Word Algebra

Enter all three words, the first two, or the last two and see the words that result.

Word 1 + (Word 2 - Word 3) = Get result

Semantic Analysis of the Reddit Hivemind

We parsed every comment posted to Reddit in 2015 and 2019, and trained different word2vec models for each year. A lot's happened over the last four years, so many words, people or events have different associations. You can also try searching for a phrase that's more than the sum of its parts to see what the model thinks it means. Try your favourite band, slang words, technical things, or something totally random.
